

Wine & Beer List

Feel Like in Italy

NATURAL WINES - no chemical fertilisers or pesticides used in the vineyard, and no filtration, added yeast, enzymes, and very little sulphur added in the cellar.

ORGANIC WINES - made from grapes grown without artificial fertilisers, fungicides, pesticides or weedkillers. The use of copper, sulphur dioxide and a number of organically derived vine treatments are permitted in order to counteract the effects of the weather. A limited selection of organically derived additives are allowed in the cellar.

Orange Wines

White grapes are left in contact with their skins (and sometimes their seeds and stalks) for a prolonged length of time, in effect making a white as if it were a red. This is a very natural process that uses spontaneous fermentation, and little or no additives.
